### Erklärung zur Veröffentlichung der vorstehend bezeichneten Abschlussarbeit

Die Entscheidung über die vollständige oder auszugsweise Veröffentlichung der Abschlussarbeit liegt grundsätzlich erst einmal allein in der Zuständigkeit der/des studentischen Verfasserin/Verfassers. Nach dem Urheberrechtsgesetz (UrhG) erwirbt die Verfasserin/der Verfasser einer Abschlussarbeit mit Anfertigung ihrer/seiner Arbeit das alleinige Urheberrecht und grundsätzlich auch die hieraus resultierenden Nutzungsrechte wie z.B. Erstveröffentlichung (§ 12 UrhG), Verbreitung (§ 17 UrhG), Vervielfältigung (§ 16 UrhG), Online-Nutzung usw., also alle Rechte, die die nicht-kommerzielle oder kommerzielle Verwertung betreffen.

Die Hochschule und deren Beschäftigte werden Abschlussarbeiten oder Teile davon nicht ohne Zustimmung der/des studentischen Verfasserin/Verfassers veröffentlichen, insbesondere nicht öffentlich zugänglich in die Bibliothek der Hochschule einstellen.

Hiermit ☐ genehmige ich, wenn und soweit keine entgegenstehenden Vereinbarungen mit Dritten getroffen worden sind,

☐ genehmige ich nicht,

dass die oben genannte Abschlussarbeit durch die Technische Hochschule Nürnberg Georg Simon Ohm, ggf. nach Ablauf einer mittels eines auf der Abschlussarbeit aufgebrachten Sperrvermerks kenntlich gemachten Sperrfrist

von                      Jahren (0 - 5 Jahren ab Datum der Abgabe der Arbeit),

der Öffentlichkeit zugänglich gemacht wird. Im Falle der Genehmigung erfolgt diese unwiderruflich; hierzu wird der Abschlussarbeit ein Exemplar im digitalisierten PDF-Format auf einem Datenträger beigelegt. Bestimmungen der jeweils geltenden Studien- und Prüfungsordnung über Art und Umfang der im Rahmen der Arbeit abzugebenden Exemplare und Materialien werden hierdurch nicht berührt.

## **Kurzdarstellung**

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

## **Abstract**

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

## Chapter 2.

### Data

Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

This is the second paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

And after the second paragraph follows the third paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

After this fourth paragraph, we start a new paragraph sequence. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are

written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.

## Chapter 3.

### Method

In this chapter, we're actually using some code!

```
1 x = 1
2 if x == 1:
3     # indented four spaces
4     print("x is 1.")
```

Listing 3.1: This is an example of inline listing

You can also include listings from a file directly:

```
1 x = 1
2 if x == 1:
3     # indented four spaces
4     print("x is 1.")
```

Listing 3.2: This is an example of included listing

## Chapter 4.

### Experiments

This is the second paragraph. Hello, here is some text without a meaning. This text should show what a printed text will look like at this place. If you read this text, you will get no information. Really? Is there no information? Is there a difference between this text and some nonsense like “Huardest gefburn”? Kjift – not at all! A blind text like this gives you information about the selected font, how the letters are written and an impression of the look. This text should contain all letters of the alphabet and it should be written in of the original language. There is no need for special content, but the length of words should match the language.
